SUBJECT INDEX

Alloys
  precipitate identification in some $(Fe_{1-y}Mn_y)_3Ga_{2-x}As_x$ alloys, 125
  twinning observed by X-ray diffraction in AuCu-ordered alloys, 101
Aluminium
  high pressure–high temperature synthesis and crystal structure of $Al_{11}Au_6$ and AlAu, 143
  magnetic properties of $REAl_6Fe_6$ compounds for RE = Y, Dy and Ho, 273
  quantum chemistry analysis of compounds with interstitial C, Si and Al in Zr_6 clusters, 295
Antimony
  dielectric properties of Sb_2O_3 thin film capacitors, 381
  phase transformation of AnX compounds under high pressure (An = Np, Pu; X = Sb, Te), 35
Arsenic
  precipitate identification in some $(Fe_{1-y}Mn_y)_3Ga_{2-x}As_x$ alloys, 125
Artificial slags
  purification of indium from thallium inclusions by the process of remelting under artificial slags, 117

Barium
  comment on structural properties of the tetragonal superconductors $LaBaCaCu_3O_{7-\delta}$, 505
  phase equilibria, structure and properties of Y–Ba ceramic, 309
Binary alloy systems
  calculation of high pressure phase diagrams of binary alloy systems, 237
Bismuth
  influence of the preparation technique on the electrical properties of the 2212 high T_c superconductor $Bi_{1.75}Pb_{0.25}Sr_2CaCu_2O_{8+z}$, L1
  thermodynamics of the ternary system Au–Bi–Pb (I) determination of the partial molar free energy of lead, 61
  thermodynamics of the ternary system Au–Bi–Pb (II) application of the Hoch–Arpshofen model, 367

Calcium
  influence of the preparation technique on the electrical properties of the 2212 high T_c superconductor $Bi_{1.75}Pb_{0.25}Sr_2CaCu_2O_{8+z}$, L1
  comment on structural properties of the tetragonal superconductors $LaBaCaCu_3O_{7-\delta}$, L5
Carbides
  UW_4C_4, a distorted structure derived from UCr_4C_4 and the ternary U–W–C system, 185
Ceramics
  phase equilibria, structure and properties of Y–Ba ceramic, 309
Cerium
  crystal structure of "Ce_3Ga_2" ($Ce_{4.8}Ga_{3.2}$), 229
  influence of non-stoichiometry on the variation in isothermal expansion of dioxides. Application to the oxides of titanium and cerium, 53
  new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). I compositions and crystalline parameters, 197
  new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). II trial study of their non-stoichiometry, 215
Chromium
  hydrogenation characteristics of the $Zr_{1-x}Ti_xCr_{1-y}Fe_{1+y}$ Laves phase alloys, 259
Clusters
  quantum chemistry analysis of compounds with interstitial C, Si and Al in Zr_6 clusters, 295
Cobalt
  exchange interaction and magnetocrystalline anisotropy in $R_2Fe_{12}Co_2B$ compounds (R = Y, Gd, Nd), 109

phase equilibria in cobalt-rich portions of the Co–Si and Co–Ge systems, 153
phase equilibria in the Mo–Ni–Co and Mo–Ni–Fe systems at 1000 °C, 29
Copper
aging behaviour in a dental low carat gold alloy and its relation to CuAuII, 247
influence of the preparation technique on the electrical properties of the 2212 high T_c superconductor $Bi_{1.75}Pb_{0.25}Sr_2CaCu_2O_{8+z}$, L1
comment on structural properties of the tetragonal superconductors $LaBaCaCu_3O_{7-\delta}$, L5
twinning observed by X-ray diffraction in AuCu-ordered alloys, 101
Crystal structure
crystal structure of "Ce_3Ga_2" ($Ce_{4.8}Ga_{3.2}$), 229
crystal structure and the magnetic order of $U_{14}Au_{51}$, 171

Dental alloys
aging behaviour in a dental low carat gold alloy and its relation to CuAuII, 247
Dielectric properties
dielectric properties of Sb_2O_3 thin film capacitors, 381
Diffusion
thermal diffusion of mendelevium in tantalum, 363
Dysprosium
magnetic properties of $REAl_6Fe_6$ compounds for RE ≡ Y, Dy and Ho, 273

Exchange interactions
exchange interaction and magnetocrystalline anisotropy in $R_2Fe_{12}Co_2B$ compounds (R ≡ Y, Gd, Nd), 109

Field-ion microscopy
stress-induced hydride phase in niobium observed with a field-ion microscope, 283
Films
phase transitions, resistivity, and the suppression of direct hydrogen–atom interactions in tantalum hydride films, 15

Gadolinium
exchange interaction and magnetocrystalline anisotropy in $R_2Fe_{12}Co_2B$ compounds (R ≡ Y, Gd, Nd), 109
Gallium
crystal structure of "Ce_3Ga_2" ($Ce_{4.8}Ga_{3.2}$), 229
precipitate identification in some $(Fe_{1-y}Mn_y)_3Ga_{2-x}As_x$ alloys, 125
X-ray emission studies of some $REGaO_3$ single crystals, 79
Germanium
new isotypes of $CeNiSi_2$ in the system R–M–X (R ≡ La–Lu, M ≡ metals in groups 7–11 and X ≡ Ge, Sn). I compositions and crystalline parameters, 197
new isotypes of $CeNiSi_2$ in the system R–M–X (R ≡ La–Lu, M ≡ metals in groups 7–11 and X ≡ Ge, Sn). II trial study of their non-stoichiometry, 215
phase equilibria in cobalt-rich portions of the Co–Si and Co–Ge systems, 153
Gold
aging behaviour in a dental low carat gold alloy and its relation to CuAuII, 247
crystal structure and the magnetic order of $U_{14}Au_{51}$, 171
high pressure–high temperature synthesis and crystal structure of $Al_{11}Au_6$ and AlAu, 143
KAuTe, synthesis and structure of the first alkali metal–gold tellurides, 181
thermodynamics of the ternary system Au–Bi–Pb (I) determination of the partial molar free energy of lead, 61
thermodynamics of the ternary system Au–Bi–Pb (II) application of the Hoch–Arpshofen model, 367
twinning observed by X-ray diffraction in AuCu-ordered alloys, 101

Hoch–Arpshofen model
thermodynamics of the ternary system Au–Bi–Pb (II) application of the Hoch–Arpshofen model, 367
Holmium
magnetic properties of $REAl_6Fe_6$ compounds for RE ≡ Y, Dy and Ho, 273
Hydrides
phase transitions, resistivity, and the suppression of direct hydrogen–atom interactions in tantalum hydride films, 15
stress-induced hydride phase in niobium observed with a field-ion microscope, 283
Hydrogen uptake
hydrogen uptake by Pd-coated Mg: absorption–decomposition isotherms and uptake kinetics, 323

hydrogen-atom interactions
phase transitions, resistvity, and the suppression of direct hydrogen–atom interactions in tantalum hydride films, 15
Hydrogenation
hydrogenation characteristics of the $Zr_{1-x}Ti_xCr_{1-y}Fe_{1+y}$ Laves phase alloys, 259

Indium
purification of indium from thallium inclusions by the process of remelting under artificial slags, 117
Ion-mixed binary alloys
model of phase formation in ion-mixed binary alloys with positive heats of formation, 351
Isothermal expansion
influence of non-stoichiometry on the variation in isothermal expansion of dioxides. Application to the oxides of titanium and cerium, 53

Knudsen effusion cell
vapour pressure of Pd(g) measured over Pd(s) by Knudsen effusion cell mass spectrometry, 133

Lanthanum
comment on structural properties of the tetragonal superconductors $LaBaCaCu_3O_{7-\delta}$, L5
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). I compositions and crystalline parameters, 197
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). II trial study of their non-stoichiometry, 215
Laves phase alloys
hydrogenation characteristics of the $Zr_{1-x}Ti_xCr_{1-y}Fe_{1+y}$ Laves phase alloys, 259
Lead
influence of the preparation technique on the electrical properties of the 2212 high T_c superconductor $Bi_{1.75}Pb_{0.25}Sr_2CaCu_2O_{8+\delta}$, L1
thermodynamics of the ternary system Au–Bi–Pb (I) determination of the partial molar free energy of lead, 61
thermodynamics of the ternary system Au–Bi–Pb (II) application of the Hoch–Arpshofen model, 367

Lutetium
new isotypes of $CeNiSi_2$ in the system R–M–X (R = L–Lu, M = metals in groups 7–11 and X = Ge, Sn). I compositions and crystalline parameters, 197
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). II trial study of their non-stoichiometry, 215

Magnesium
hydrogen uptake by Pd-coated Mg: absorption–decomposition isotherms and uptake kinetics, 323
Magnetic order
crystal structure and the magnetic order of $U_{14}Au_{51}$, 171
Magnetic properties
magnetic properties of $REAl_6Fe_6$ compounds for RE = Y, Dy and Ho, 273
Magnetocrystalline anisotropy
exchange interaction and magnetocrystalline anisotropy in $R_2Fe_{12}Co_2B$ compounds (R = Y, Gd, Nd), 109
Manganese
precipitate identification in some $(Fe_{1-y}Mn_y)_3Ga_{2-x}As_x$ alloys, 125
Mass spectrometry
vapour pressure of Pd(g) measured over Pd(s) by Knudsen effusion cell mass spectrometry, 133
Mendelevium
thermal diffusion of mendelevium in tantalum, 363
Metal hydrides
theoretical descriptions and experimental measurements on the effective thermal conductivity in metal hydride powder beds, 387
Metal oxides
high temperature interactions of metal oxides with NaCl, 1
Molybdenum
phase equilibria in the Mo–Ni–Co and Mo–Ni–Fe systems at 1000 °C, 29

Neodymium
characterization of neodymium trichloride hydrates and neodymium hydroxychloride, 85
exchange interaction and magnetocrystalline anisotropy in $R_2Fe_{12}Co_2B$ compounds (R = Y, Gd, Nd), 109

Neptunium
phase transformation of AnX compounds under high pressure (An = Np, Pu; X = Sb, Te), 35
Nickel
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). I compositions and crystalline parameters, 197
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). II trial study of their non-stoichiometry, 215
phase equilibria in the Mo–Ni–Co and Mo–Ni–Fe systems at 1000 °C, 29
Niobium
characteristics of a production route for filamentary Nb_3Sn superconductors based on a reaction between niobium and Nb_6Sn_5, 161
non-stoichiometry and twinning in NbN_{1-x}: a study of synthesis and structure in a defect NaCl-type solid, 193
stress-induced hydride phase in niobium observed with a field-ion microscope, 283
Nitrides
non-stoichiometry and twinning in NbN_{1-x}: a study of synthesis and structure in a defect NaCl-type solid, 193
Non-stoichiometry
influence of non-stoichiometry on the variation in isothermal expansion of dioxides. Application to the oxides of titanium and cerium, 53
non-stoichiometry and twinning in NbN_{1-x}: a study of synthesis and structure in a defect NaCl-type solid, 193

Palladium
hydrogen uptake by Pd-coated Mg: absorption–decomposition isotherms and uptake kinetics, 323
vapour pressure of Pd(g) measured over Pd(s) by Knudsen effusion cell mass spectrometry, 133
Phase diagrams
calculation of high pressure phase diagrams of binary alloy systems, 237
Phase equilibria
phase equilibria in cobalt-rich portions of the Co–Si and Co–Ge systems, 153
phase equilibria in the Mo–Ni–Co and Mo–Ni–Fe systems at 1000 °C, 29
phase equilibria, structure and properties of Y–Ba ceramic, 309
Phase formation
model of phase formation in ion-mixed binary alloys with positive heats of formation, 351
Phase transformation
phase transformation of AnX compounds under high pressure (An = Np, Pu; X = Sb, Te), 35
Phase transitions
phase transitions, resistivity, and the suppression of direct hydrogen–atom interactions in tantalum hydride films, 15
Phosphorus
vaporization behavior of V_3P(s), 343
Plutonium
phase transformation of AnX compounds under high pressure (An = Np, Pu; X = Sb, Te), 35
Potassium
KAuTe, synthesis and structure of the first alkali metal–gold tellurides, 181
Powder beds
theoretical descriptions and experimental measurements on the effective thermal conductivity in metal hydride powder beds, 387
Precipitates
precipitate identification in some $(Fe_{1-y}Mn_y)_3Ga_{2-x}As_x$ alloys, 125

Quantum chemistry
quantum chemistry analysis of compounds with interstitial C, Si and Al in Zr_6 clusters, 295

Rare earths
X-ray emission studies of some $REGaO_3$ single crystals, 79
Resistivity
phase transitions, resistivity, and the suppression of direct hydrogen–atom interactions in tantalum hydride films, 15

Silicon
phase equilibria in cobalt-rich portions of the Co–Si and Co–Ge systems, 153
Sodium chloride
high temperature interactions of metal oxides with NaCl, 1
Strontium
influence of the preparation technique on the electrical properties of the 2212 high T_c superconductor $Bi_{1.75}Pb_{0.25}Sr_2CaCu_2O_{8+z}$, L1
Superconductors
characteristics of a production route for

filamentary Nb_3Sn superconductors based on a reaction between niobium and Nb_6Sn_5, 161
influence of the preparation technique on the electrical properties of the 2212 high T_c superconductor $Bi_{1.75}Pb_{0.25}Sr_2CaCu_2O_{8+\delta}$, L1
comment on structural properties of the tetragonal superconductors $LaBaCaCu_3O_{7-\delta}$, L5

Tantalum
phase transitions, resistivity, and the suppression of direct hydrogen–atom interactions in tantalum hydride films, 15
thermal diffusion of mendelevium in tantalum, 363
Tellurium
KAuTe, synthesis and structure of the first alkali metal–gold tellurides, 181
phase transformation of AnX compounds under high pressure (An = Np, Pu; X = Sb, Te), 35
Thallium
purification of indium from thallium inclusions by the process of remelting under artificial slags, 117
Thermal conductivity
theoretical descriptions and experimental measurements on the effective thermal conductivity in metal hydride powder beds, 387
Thermodynamics
thermodynamics of the ternary system Au–Bi–Pb(l)
determination of the partial molar free energy of lead, 61
Thin film capacitors
dielectric properties of Sb_2O_3 thin film capacitors, 381
Tin
characteristics of a production route for filamentary Nb_3Sn superconductors based on a reaction between niobium and Nb_6Sn_5, 161
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). I compositions and crystalline parameters, 197
new isotypes of $CeNiSi_2$ in the system R–M–X (R = La–Lu, M = metals in groups 7–11 and X = Ge, Sn). II trial study of their non-stoichiometry, 215
Titanium
hydrogenation characteristics of the $Zr_{1-x}Ti_xCr_{1-y}Fe_{1+y}$ Laves phase alloys, 259
influence of non-stoichiometry on the variation in isothermal expansion of dioxides. Application to the oxides of titanium and cerium, 53
Tungsten
UW_4C_4, a distorted structure derived from UCr_4C_4 and the ternary U–W–C system, 185
Twinning
non-stoichiometry and twinning in NbN_{1-x}: a study of synthesis and structure in a defect NaCl-type solid, 193
twinning observed by X-ray diffraction in AuCu-ordered alloys, 101

Uranium
crystal structure and the magnetic order of $U_{14}Au_{51}$, 171
UW_4C_4, a distorted structure derived from UCr_4C_4 and the ternary U–W–C system, 185

Vanadium
vaporization behavior of $V_3P(s)$, 343
vapour pressure
vapour pressure of Pd(g) measured over Pd(s) by Knudsen effusion cell mass spectrometry, 133
Vapourization
vaporization behavior of $V_3P(s)$, 343

X-ray diffraction
twinning observed by X-ray diffraction in AuCu-ordered alloys, 101
X-ray emission
X-ray emission studies of some $REGaO_3$ single crystals, 79

Yttrium
exchange interaction and magnetocrystalline anisotropy in $R_2Fe_{12}Co_2B$ compounds (R = Y, Gd, Nd), 109
magnetic properties of $REAl_6Fe_6$ compounds for RE = Y, Dy and Ho, 273
phase equilibria, structure and properties of Y–Ba ceramic, 309

Zirconium
hydrogenation characteristics of the $Zr_{1-x}Ti_xCr_{1-y}Fe_{1+y}$ Laves phase alloys, 259
quantum chemistry analysis of compounds with interstitial C, Si and Al in Zr_6 clusters, 295
